Plan Summary Statement

This plan summary reflects the content of the toxic substance reduction plan for Eston Manufacturing a Division of Linamar Holdings Inc. for Copper.

Statement of Intent

Eston Manufacturing a Division of Linamar Holdings Inc. (Eston) is committed to playing a leadership role in protecting the environment. Whenever feasible, we will reduce the use of Copper in compliance with all Federal and Provincial Regulations.

Objectives

Eston prides itself on technological innovation in order to produce high quality automotive parts in an environmentally responsible manner. Through this plan, Eston will determine the

technical and economic feasibility of each option to determine which, if any, are viable for implementation at this time.

Reduction Options to be implemented

The following options have been identified for implementation to reduce the use and/or amount of Copper transferred:

- Work with suppliers to reduce foundry defects received
- Implement training practices/procedures amongst machine operators to reduce scrap materials

Work with suppliers to reduce foundry defects received.

This option is an on-going procedure at Eston, with annual reduction targets that will change from year to year. The schedule for this reduction option is given below:

Step	Description	Estimated Timelines
1	Discussions with foundry supplier	January 2015 - Ongoing
2	Implement improvements to inventory management system	January 2015 – Ongoing
3	Timeline for implementation of copper reductions	End of January 2016

Implement training practices/procedures amongst machine operators to reduce scrap materials

This option is an on-going procedure at Eston, with annual reduction targets that will change from year to year. The schedule for this reduction option is given below:

Step	Description	Estimated Timelines
1	Review scrap procedures and identify improvement opportunities	January 2015 – ongoing
2	Provide Training Sessions to Operators on handling scrap	Annually
3	Timeline for implementation of Copper Reductions	End of 2016

Eston has carefully reviewed the toxic substance use reduction options to ensure that there is no net negative impact to the environment or public health. The selected options will serve to reduce the amount of Copper used in the process, and will not create any toxic by-products.

CERTIFICATION BY HIGHEST RANKING EMPLOYEE

As of December 16, 2014, I, Greg Kirkup, certify that I have read the toxic substance reduction plan for the toxic substance referred to below and am familiar with its contents, and to my knowledge the plan is factually accurate and complies with the *Toxics Reduction Act, 2009* and Ontario Regulation 455/09 (General) made under that Act.
